1. Course

1.2) Other reason for taking course:

It is a good tie between science and psychology.

1.4) Level of Effort Explanation:

I tried so hard in this class. I enjoyed it, but it was a lot of work.

I worked hard on this course, however, I wasn't able to put in as much time as I would have liked due to other classes.

I attended every class, but sometimes was not fully prepared for class

1.6) Overall Rating Explanation:

It would be nice to have the lab worth more credits than the course or more work in lecture. The majority of the workload is in lab.

Often times confused on expectations of assignments, not much guidance on certain assignments, as well as difficulty taking effective notes when trying to listen and read at the same time

CLASS was very stats oriented and thought it should be a prereq.

1.8) Likelihood Explanation:

If its for their major or they are interested in research

Confusing, but did learn formatting.

The information that we learn is very beneficial to real life situations that we will at some point face.

If they are a psychology major, I would definitely recommend they take Professor Island's course over another.

^{1.10} Skills/understanding Explanation:

APA, writing and how to conduct research increased a lot

know a lot more about APA

~~My~~ My understanding of research in psychology has greatly increased

learned more basic knowledge of Research Methods but wish I understood it more

I really did learn a lot!!

2. Instructor

2.2) Instructor Rating Explanation:

Overall, great instructor. Sometimes I was confused with layout of slides, some seemed repetitive.

Dr. Island was well organized and always prepared for lectures. She obviously cared a lot about her students, and that came out in her attitude during class.

Knows a lot, very helpful, though class structure felt very unorganized. Also Heidi is very intimidating and I felt as though if I asked a question I would be ridiculed for not attending.

Island knows her material, structure of class was easy to follow, and is approachable in clarification and asking questions.

hard to understand purpose of some activities at times due to instructions

knows a lot about the material but go quickly over some of the important stuff, slowing down would benefit both

Always available for help and questions

Very helpful and easy to talk to, to ask questions.

Tough, but a great professor.

2.4) Recommendation Explanation:

She is a great instructor!

Scary, difficult, confusing in lecture. Otherwise generally nice & pleasant.

Very knowledgeable and helpful

2.5) Please provide any additional comments that you want to make about the course and instructor.

My only complaints about this course are that it was, at times difficult to anticipate which assignments Dr. Island expected on which day. More clarity w/in the ~~1st~~ class schedule would have cleared this up.

Heide was able to take the information that presented itself as dry and relate it to real-world situations to help us understand what we were learning.
