1. Course

^{1,2)} Other reason for taking course:

→

Neuroscience emphasis

Dr. Island invited me to take it for elective credit

I want to complete the neuroprygon requenu and this is a requirement.

^{1,4)} Level of Effort Explanation:

Medic

I missed 2 classes

I worked really hard

I studied hard, showed up to class and worked efficiently the whole semester to get the grade I wanted

Finish labs early and try to participate

I enjoy the content of this class and really did try as hard as I could on every assignment, and when it came to exams I studied at least 15 hours each.

1.6) Overall Rating Explanation:

Exciting lab and informative lecture

Interesting and applicable material

A challenging course, but it helped me grow as a student to expand my knowledge and work ethic

Challenging in every way but I came out on top and it made me stronger. It helps our teacher it's absolutely amazing!

We covered a lot of information, but we learned a lot; the films and labs are very useful

1.8) Likelihood Explanation:

→ Depends on their major. If they're studying biology or interested in the biology aspect of psychology, then they should take the course.

Very useful to understand sensation and perception

If you find neuroscience interesting, this class will be fun; but you do have to work hard.

Really interesting class! I would tell other students to be prepared for a fast-paced class.

(Chocolate Tasting!

This class is quite enjoyable.

Heidi is a great, hard working and helpful teacher and makes coming to class fun.

unless you're a psych major because this class is extremely hard, but if you are
in your major, absolutely!

I have recommended this class to multiple people. Especially
my pre health / anatomy friends.

¹⁻¹⁰ Skills/understanding Explanation:

→ Feedback has only been on APA formatting, spelling and
grammar in labs. More interest.

lectures are thorough but make more sense with textbook

I feel far more comfortable with the senses,

I gained a lot of knowledge from this course than
I previously had

I have perfected my skills when it comes to writing lab and I am so thankful
for that!

so much more knowledgeable about the material

2.2) Instructor Rating Explanation:

Considerate, straightforward, helping and clear speaker

The professor was very clear and helpful. She also was very resourceful in terms of providing materials and study guides for labs and exams.

She pushed us to be our best and + is easy to see she actually cares about her students.

Heide is very thorough when covering material.

Heide was always engaging and helpful. She made difficult material understandable

Heidi is fantastic!

Heide is an excellent lecturer and always has our best interest in mind

Heidi genuinely wants to be here and is always doing her best to challenge and help everyone in the class

Very knowledgeable about the topic at hand. Can usually always answer a question and beyond

I would miss but Dr. Island is the most incredible professor. I wish I could take all my classes with her. She wants us to learn to do well and it's heart warming.

very knowledgeable and helpful

2.4) Recommendation Explanation:

- Dr Heide has a wealth of knowledge, and is passionate about sharing this to her (the topic that I would suggest very highly).

Nothing to complain unless friends are not motivated.

Heide is great, but can probably seem a little harsh to some people.

She is an amazing teacher!

She is easy to talk to, extremely knowledgeable within and outside her area of expertise, and she makes material enjoyable to learn.

Fun course and gets you involved in the class.
+ instructor

I do, all the time! This is my best I have ever had! Never have I been challenged but love it so much!

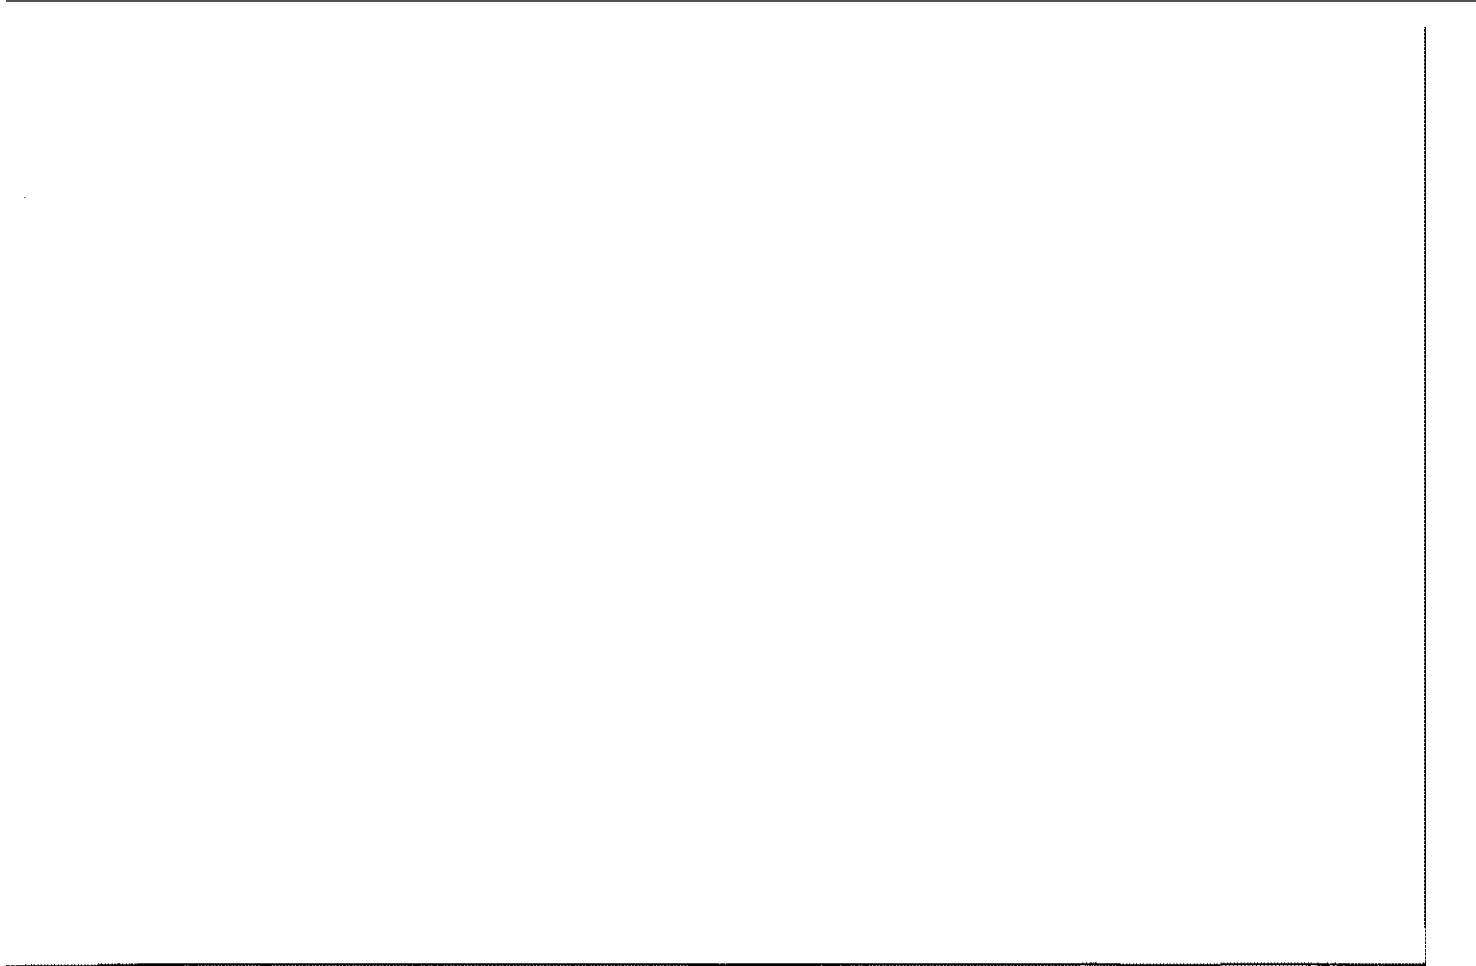

Heide has been my favorite professor.

2.5) Please provide any additional comments that you want to make about the course and instructor.

→ Compared to all my topics, BioPsy II has the most homework. I feel it is on overkill, but ~~and~~ rather than doing multiple reports to learn how to format and structure a report, fewer would ~~be~~ achieve the same result but given more weight. The effort it takes to do the report, ~~and~~ does not equal the its weighting in points.

→ However, if you are willing to put in the extra study, ~~it is~~ I would recommend BioPsy II.

→ It is a great psychology course that would help students interested in doing post grad.

This class has been fun and interesting!

Dr. Island goes above and beyond for her students. She actually cares and wants to see her succeed. I am new to this school so struggled to feel academically comfortable here, but Heide actually really helped me establish myself and coordinate an academic plan for my future. No other advisor or instructor has ever assisted me as much as Dr. Island has and I appreciate that so much. She is also super passionate (even at 7:30 A.M) when she teaches which really sparks motivation among us.
