1. Course

^{1,2)} Other reason for taking course:

This is the final course in the neuropsychology sequence

Neuroscience emphasis

Because it is awesome

general interest 😊

^{1,4)} Level of Effort Explanation:

which I had to, it is the most difficult class I have ever taken.

not sufficient effort in presentation

lot of studying

studied hard, showed up to class, stayed up late & gave my best effort

could have spent more time studying for exams

I studied for many hours, spent most effort trying to succeed in this course than others

1.6) Overall Rating Explanation:

Hard, so so so hard, but it is interesting and in the end it is so rewarding when you come out on top.

Interesting and informative.

Very interesting material, Labs were not as engaging as Intro to Neuro however

Overall, very informative and I loved the material covered

1.8) Likelihood Explanation:

unless you are completing the neurophysiology sequence or are a biology major I would not necessarily recommend this class just because it is SO hard.

only for science students

The class teaches the hormones that affect our daily lives

challenging and reward class that I would highly recommend

I talk about it all the time

As long as they're prepared for putting in the work!

^{1.10)} Skills/understanding Explanation:

my lab skills have been perfected, which I am so thankful for.

improved alot on neurochemistry + hormone-misc

I gained a lot of knowledge in this subject and gained more from taking this course

Fair amount of metabolism and hormones overlaps with biology

I understand the material, but A LOT is covered during the course.

I never really understood endocrinology or its relevance before

2. Instructor

^{2.2)} Instructor Rating Explanation:

Dr. Island is the most incredibly, intimidating, smartest person I have ever met. She cares about her students and that is so important!

Informative and helpful

Knowledgeable about what she teaches.

Gets excited about the topic which makes it easy to be engaged in lecture.

Heidi is a great teacher who continuously challenges and supports her students.

Heide is a great prof. that cares about her student's success in & outside her class. Her attention to detail is also good:

Happy, chipper and accommodating. Always seems to have time to answer questions

She is the smartest woman I have ever met and she takes class time seriously

she's extremely approachable, very flexible, and ~~just~~ really organized (which helps!)

24) Recommendation Explanation:

I do! all the time!

Unless the person is not motivated

Feels like she actually test your knowledge on the concepts

Easy to get a hold of if you need help, is very willing to work with students.

I would, she makes learning about information that could be boring, fun.

she's got the best lecture format I've ~~ex~~ experienced yet!

^{2.5)} Please provide any additional comments that you want to make about the course and instructor.

- More student involvement during lecture.

the empirical review assignment
didn't have enough guidance or
instruction and was assigned a
little too early on in the
semester
